

CELMA

*Federation of National Manufacturers Association for
Luminaires and Electrotechnical Components for
Luminaires in the European Union*

Joint CELMA / ELC LED Forum Light+Building Fair 14 April 2010

Conclusions

Jan Denneman, ELC President

Conclusions

EU Lighting Industry is working very hard to:

1. Deliver high-level “Quality” LED lighting Solutions to ensure satisfaction of consumers/users
2. Support the EU in achieving the “20/20/20” energy efficiency targets
3. Contribute to a sustainable planet by leveraging the breakthrough LED technology

Conclusions

Industry seeks support from EU and Member States

- Strong and rapid EU legislation to ensure only good quality LED products can reach EU consumers
 - Review periods in line with rapid technology evolution
- Crucial need for effective Market Surveillance across EU
 - Regulations and Standards only meaningful with active surveillance!
- Harmonized initiatives (including financial) to promote good quality LED products & systems
- Inclusion of LED Technology in the EU 'New Industrial Policy' Framework + 8th EU Framework Programme for Research
- Increased global cooperation and exchange of information (to prevent the need for national initiatives)

CELMA

*Federation of National Manufacturers Association for
Luminares and Electrotechnical Components for
Luminares in the European Union*

Conclusions

Join us in fully realizing
the huge potential and benefits
of the LED Lighting technology!
